

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1-9. (Canceled)

10. (New) A bolt lock for preventing rotation of a bolt relative to a workpiece comprising:

a locking plate having a ring-shaped body, a first extension extending from said ring-shaped body, and a second extension extending from said ring-shaped body;

wherein said ring-shaped body includes a first plurality of bendable locking tabs, said first extension includes a second plurality of bendable locking tabs, and said second extension includes a third plurality of locking tabs.

11. (New) The bolt lock of Claim 10, wherein said ring-shaped body, said first extension, and said second extension are formed of a single piece of material.

12. (New) The bolt lock of Claim 10, wherein said first plurality of tabs includes four tabs equally spaced apart along a radial inner edge of said ring-shaped body.

13. (New) The bolt lock of Claim 10, wherein said second plurality of bendable locking tabs project radially outwardly from said first extension.

14. (New) The bolt lock of Claim 10, wherein said third plurality of bendable locking tabs project radially outwardly from said second extension.

15. (New) The bolt lock of Claim 10, wherein said second plurality of bendable locking tabs includes three tabs spaced approximately ninety degrees apart and said third plurality of bendable locking tabs includes three tabs spaced approximately ninety degrees apart.

16. (New) The bolt lock of Claim 10, wherein said first plurality of bendable locking tabs are movable between an engaged position contacting a head of said bolt and a disengaged position retracted from said head of said bolt.

17. (New) The bolt lock of Claim 16, wherein said first plurality of bendable locking tabs are substantially perpendicular to said ring-shaped body in said disengaged position and are formed at an angle relative to said ring-shaped body in said engaged position.

18. (New) The bolt lock of Claim 10, wherein said second plurality of bendable locking tabs are movable between an engaged position contacting a head of said bolt and a disengaged position removed from said head of said bolt.

19. (New) The bolt lock of Claim 18, wherein said second plurality of bendable locking tabs are substantially parallel to said ring-shaped body in said disengaged

position and are formed at an angle relative to said ring-shaped body in said engaged position.

20. (New) The bolt lock of Claim 10, wherein said third plurality of bendable locking tabs are movable between an engaged position contacting a head of said bolt and a disengaged position removed from said head of said bolt.

21. (New) The bolt lock of Claim 10, wherein said third plurality of bendable locking tabs are substantially parallel to said ring-shaped body in said disengaged position and are formed at an angle relative to said ring-shaped body in said engaged position.

22. (New) The bolt lock of Claim 10, wherein said second extension is substantially diametrically opposed to said first extension.
